SPECIALIZING IN SHORT RUN HEAVY SHEET AND LIGHT PLATE FABRICATION TO 20 FEET

FACILITIES

- SHEARING:** .375 X 14 ft. (170") Shear—.015 to .375 mild steel, .015 to .500 alum, .015 to .250 stainless.
- PUNCHING:** WAW—647 CNC Punch-plasma (Hi-Definition) combination, will punch to 40 tons and will punch & burn steel, aluminum, or stainless to .500 thick—with a plate size of 96 X 240.
Turret Press—CNC 22 ton, will handle material to 10 ga. X 48 X 144 or longer.
- FORMING:** Press Brake—CNC 7 Axis 400 ton X 18 ft. brake—will form 18' of .500 mild steel.
CNC 7 Axis 250 ton X 20 ft. brake—will form 20' of .250 mild steel.
Bender—CNC Horizontal rod & bar bender—36-ton capacity
Roller—Sheet to 10 ga. X 5 ft. wide, maximum thickness .75 on narrower items.
Plate to .375 X 14 ft. wide, maximum thickness 1.50" on narrower items.
- MACHINING:** Bridgeport-type mill (2), Lathe—15" x 48", Radial Drill—Small, Mag-drill, Roto-Broach.
- SAWING:** Vertical Tilt-head Mitering Band Saw Automatic Feed—18" X 22"
- WELDING:** Complete welding facilities for MIG, TIG, ARC, Spot; aluminum, steel, and stainless as well as some exotic metals. (Several certifications)
- DEDURRING:** Complete deslagging and deburring equipment.
- BEVELING:** Sheet, plate, tube and pipe beveling
- HANDLING** Two 10,000# Cranes, Forklifts (6) to 12000#
- OTHER:** We have competitive, long-standing relationships with Laser, Water-jet, Machining, painting, and plating sources.
- INVENTORY:** To keep costs down our inventories are kept low. We have relationships with key suppliers that give us "next-day"
Delivery and some are "same-day" if needed. We will also process your material.

FABrication EXPertise + FABrication EXperience = FABrication EXcellence.
